Noise level

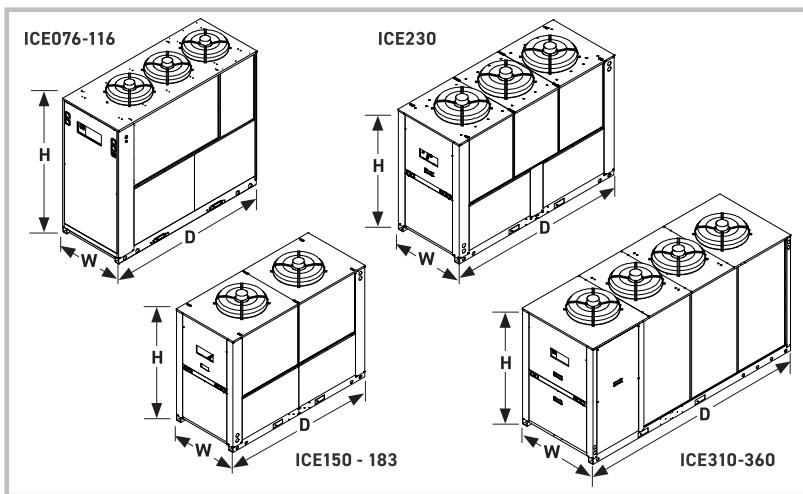

Sound pressure (axial) ²	dB(A)	58	58	58	62	62	64	65	65
-------------------------------------	-------	----	----	----	----	----	----	----	----

1) At water in/out temperature 20/15°C, glycol 0%, either 25°C ambient temperature (air-cooled models) or 25°C condenser water inlet temperature with 35°C condensing temperature (water-cooled models).

2) Referred to axial fan version in free field conditions at a distance of 10 m from until, measured on condenser side, 1m from ground.

3) Value calculated in accordance with the European regulation (EU) 2016/2281 with regards to Ecodesign requirements for high temperature process chillers.

As the manufacturer of process chillers delivering water at a design temperature of 15°C, Parker Hannifin Manufacturing s.r.l., Gas Separation and Filtration Division EMEA, declares that Parker chillers are exempt from Ecodesign EU regulation 2016/2281.

Correction Factors

A)	Ambient Temperature (Air Cooled Models)	°C	5	10	15	20	25	30	35	40	45
	Correction Factor (f1)		1.05	1.05	1.05	1.05	1	0.95	0.89	0.83	0.77
B)	Water Outlet Temperature	°C	5	10	15	20	25				
	Correction Factor (f2)		0.72	0.86	1	1	1				
C)	Glycol	%	0	10	20	30	40				
	Correction Factor (f3)		1	0.99	0.98	0.97	0.96	0.94			
D)	Condenser Water Inlet Temp. (Water Cooled Models)	°C	20	25	30	35					
	Correction Factor (f4)		1.05	1	0.95	0.9	0.85				

To obtain the required cooling capacity multiply the value at nominal conditions by the above correction factors (i.e. cooling capacity = $P \times f1 \times f2 \times f3 \times f4$, where P is the cooling capacity at conditions (1)). Hyperchill, in its standard configuration, can operate up to ambient temperatures of max 45°C and min. 5°C and water temperatures of max 30°C inlet and min. 0°C outlet. The above correction factors are approximative: for a precise selection always refer to the software selection programme.

Hyperchill Industrial Process Chiller (50Hz)
